

Development Homework WEEK 1

Study Figure 1, which shows the distribution of HICs, LICs and Newly Emerging Economies (NEEs).

1) Using Figure 1, describe the global distribution of LICs (2)

.....

.....

.....

2) 'Canada is the most developed of these countries' Do you agree with this statement? Justify your answer using figure 2 (4)

Figure 2

	Canada	Malaysia	Angola
GNI per head	\$41 170	\$21 430	\$6560
Birth rate	10.28	19.71	38.78
Death rate	8.42	5.03	11.49
Infant mortality rate	4.65	13.27	78.26
Life expectancy	81.76	74.75	55.63
Literacy rate	97.1%	94.6%	71.1%

Figure 3

Country	HDI Value
Canada	0.913
Malaysia	0.779
Angola	0.532

GEOGRAPHY SKILL QUESTION:

5) Answer all questions. (please redraw the graph if unable to print)

As part of a fieldwork enquiry, a student counted the number of walkers to pass a certain point on a footpath during a 10-minute period. She then measured the width of the footpath using a metre ruler. She repeated this at ten different points on the footpath. The results are shown in **Figure 3**.

Complete the graph in **Figure 3** by adding the data for the final site, which was used by 16 walkers and measured 350 cm wide.

[1]

Draw a line of best fit on the graph in **Figure 3**.

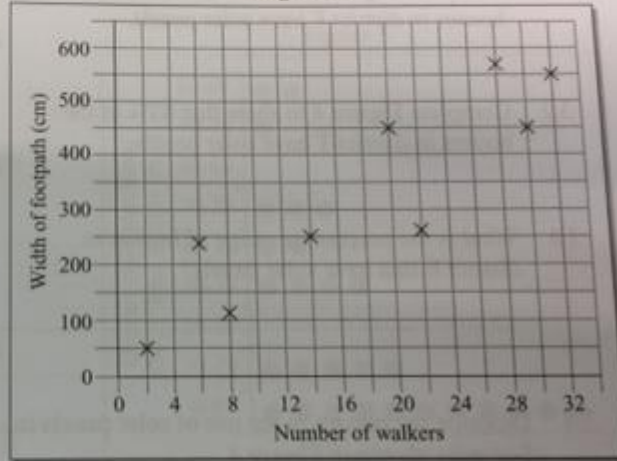

[1]

Using **Figure 3**, predict the width of a stretch of footpath used by 26 walkers.

..... cm

[1]

Figure 3

Suggest **one** possible problem with the method used to measure the width of the footpath that might lead to inaccuracies in the data collected.

.....

.....

.....

[2]

HINT – WHAT IS THE PROBLEM WITH A 1 METER RULE WHEN MEASURING A 6M FOOTPATH?
